

Child Care in San Juan County

October 2010

Child Care Resource & Referral Across Washington State

These state and county profiles are compiled by the Washington State Child Care Resource & Referral Network (CCR&R Network) in partnership with the Washington State Department of Early Learning.

Established by state statute in 1989, the CCR&R Network connects families seeking child care with licensed providers; supports child care providers by enhancing the quality of their care and small businesses; leverages resources in order to increase the availability and affordability of quality child care; and informs policy makers using data collected statewide in local communities.

During 2009, the CCR&R Network's 11 member agencies:

- Handled 90,908 calls;
- Processed 19,806 public referral calls;
- Served 17,908 families and 25,425 children; and
- Assisted 10,190 low-income families find child care.

Child Care Resource & Referral Supports Communities by:

- Helping parents find quality child care for their children;
- Sharing parenting and child development information with families who seek it;
- Providing training to providers so their care is high quality and their businesses are strong;
- Collaborating with local partners to ensure that child care is available and affordable in every community; and
- Advocating for effective public policies that support families and child care providers.

Child Care Resource & Referral In San Juan County

The Opportunity Council hosts the child care resource and referral (CCR&R) program serving San Juan County. In 2009, staff responded to 3,089 calls in the region from parents, providers and community members seeking information and assistance navigating the child care system. CCR&R staff and consultants are also out in the field to the extent funding allows: conducting training, collaborating with community partners, and reaching out to families across income levels, geographic barriers, and ethnic identities to provide them with vital child care consumer education.

Notable highlights of this report:

- The only licensed child care available in the county has been in center facilities. Despite the gain of 2 additional centers since 2005, the number of potential center-based child care slots has decreased by 3.
- There is no licensed care available during non-standard hours such as evenings, overnight or on weekends.
- Infant care continues to be the most difficult care to find and the most expensive, with a median cost of \$9,620 annually. For a family with an infant and a preschooler in full-time care, the median cost would represent 34% of the county's 2009 median household income.

Child Care Resource and Referral strengthens the ability of families, caregivers and communities to nurture, support and educate their children, while building a supply of affordable, high quality child and youth care throughout Whatcom, Island, and San Juan Counties.

People

Population	16,300
Change since 2004	1,200
Children under 5 years:	571
Children under 13 years	1,841
% of Children under 18 living in poverty	14%
Ranking among WA Counties in rate of child poverty	33
K-12 enrollment	1,652
Children in Care Zone ¹	1,271
Average number children on child care subsidy	70/month
Head Start/ECEAP Slots	18

Economics

Living Wage ²	\$44,100/yr
Median Household Income	\$52,671/yr
Unemployment Rate	6.4%

Notes:

¹ Care Zone is defined as the number of children who live in a single-parent or two-parent home where the parent or both parents are working.

²The living wage measure is based on a family of four and represents twice the federal poverty level of income.

Licensed Child Care in Our Community

How many providers are there in my area by type?

Centers account for 100% of the 9 licensed facilities in San Juan County. In the past five years, the overall number of licensed facilities has increased by a net of 2, or 29%.

During the last 5 years, there were no family child care businesses in the county. In this same time, the number of center facilities has increased by a net of 2 facilities, or 29%.

How has the number of child care slots changed over the last five years?

In the past five years, despite the gain in the number of centers, the county has experienced a 1% decrease in the number of potential center-based child care slots (with the loss of 3 slots). There are no potential family child care slots in San Juan County.

What is the distribution of slots by type of care and by age?

Because of a higher required ratio of adults to children under 2 years old in licensed care, there are fewer slots for infants and toddlers than for other age groups. There are at most 6 potential infant slots in licensed care in the community, all in centers.

Note: This chart does not represent actual enrollment of children in care. The number of slots for all children is overstated in this comparison. It shows each age group filled as if there were no other children in the other age groups. If a slot is filled for one age group it cancels out the potential slot for the other age groups.

What languages are spoken?

All of the providers in San Juan County speak English. Four providers report having staff who speak Spanish, and one facility has staff who speak French.

Languages Spoken by Providers	
English	100%
Spanish	44%
French	11%

How much non-standard care is available in my community?

All of the providers offer full- and part-time care during weekdays only. No providers report offering care during non-standard hours, such as care in the evenings past 6:30 PM, overnight, or on weekends.

Economics of Child Care Providers**What do child care providers earn compared to kindergarten teachers?**

2010 Average Salary Comparisons: Kindergarten Teachers and Child Care Providers			
Public School Kindergarten Teacher	Director Child Care Center	Teacher Child Care Center	Family Child Care Provider Business Gross Income
\$48,483/yr \$4,040/mo	\$35,088/yr \$2,924/mo	\$23,724/yr \$1,977/mo	\$35,015/yr \$2,917/mo

Washington's kindergarten teachers earn 38% more than center directors, more than double what child care teachers earn, and 39% more than family child care providers' gross earnings in the region. The substantial wage differential can be attributed to higher educational requirements for kindergarten teachers and relatively low turnover in public schools. The lack of competitive wages makes it difficult to recruit and retain educated child care workers and can have a negative impact on the quality of care.

How does the child care subsidy reimbursement rate affect provider profitability?

Current state child care subsidy reimbursement rates are one constraint on wages, quality, and financial solvency for providers.

2009 Ranges: Monthly Full-Time Subsidy Reimbursement Rates				
	Infant	Toddler	Preschool	School-Age
Centers	\$826	\$689	\$595	\$578
Family Child Care Homes	\$737	\$635	\$559	\$508

To support the average 2010 salary of a teacher, aide and part of the cost of the director for an infant classroom in a center, a program would need to enroll at least **5.3** of the licensed maximum of 8 subsidized full-time infants. Income generated from the other **2.7** infants would have to cover all other classroom costs including benefits, training, rent and supplies.

In a typical family child care home, one provider might have two toddlers and four preschoolers. A provider's gross earnings if all the children are on subsidy would be **\$3,712** per month. Out of these earnings, the provider must pay all expenses, including salaries, benefits, taxes, rent, meals, training, equipment and supplies.

Quality Initiatives**CCR&R Training & Education**

The CCR&R Network provides state-mandated training for providers. In 2009, this CCR&R offered **17 trainings** for the workforce in the region.

Washington Scholarships for Child Care Professionals is a scholarship program that provides financial support for centers and school age staff and family child care providers to obtain higher education degrees and credentials in early childhood education. In 2010, **1 scholarship** was awarded in the county.

Quality Rating in Communities

Seeds to Success is the voluntary quality rating and improvement system for licensed child care being piloted in Washington. The Washington State Department of Early Learning and Thrive by Five Washington are partnering to test the Seeds to Success standards with the help of **93** voluntary facilities in White Center (King County), East Yakima and in Spokane, Kitsap and Clark counties. In fall 2010, Seeds sites received a baseline rating:

Environment Rating Scales (ERS) - Scale of 1 (Inadequate) to 7 (Excellent)

Early Childhood	4.29
Infant/Toddler	3.84
Family Child Care	3.92
Overall Average	Centers: 4.01
	FCC: 3.91

The **3.82 to 4.25** score range on the ERS indicates "minimum to better than custodial care".

Classroom Assessment Scoring System (CLASS)-Scale of 1 (low) to 7 (high)

	Centers	FCC
Emotional Support	5.12	5.82
Classroom Organization	4.58	5.22
Instructional Support	3.35	3.05

CLASS measures teacher/child interaction. CLASS scores are in the mid-range.

Seeds to Success Quality Standard Areas Scale of 1 (low) to 5 (high)

	Centers	FCC
Overall Average	1.08	1.00

The baseline data shows that children are cared for in facilities with warm and responsive providers. The overall **1 to 1.08** average rating also indicates the need for **quality improvement investments that ensure children receive high quality early learning opportunities that promote ready and successful children.**

In spring 2011, programs will receive a second rating after receiving targeted coaching and professional development. In late 2011, DEL will adopt the final seeds model and expand statewide, depending on funding availability.

About the Families

Families who access CCR&R services are regularly surveyed by the CCR&R Network in order to enhance our services and inform policymakers. Parents report that they contact their local CCR&Rs for:

- A list of providers (86%)
- Information on child care options (55%)
- Education about what quality childcare looks like (9%)
- Details on child care rules and regulations (9%)
- Child care payment options (5%)

Parents surveyed indicated that CCR&R services helped them understand:

- The steps to take to find childcare (64%)
- The importance of quality child care for their child's development and growth (64%)
- What their family needs from a childcare provider (59%)
- What a quality childcare provider looks like (59%)

64% of parents surveyed reported that they found child care as a result of contacting their local child care resource and referral.

“This is a wonderful program. I had a tough time sending my child to day-care and they made the process a lot easier. It was a little overwhelming and I didn't know where to begin looking. I would recommend this program to any one of my friends.”

— Anonymous Parent, 2010 Survey

Affordability for Families

How much does child care cost in my community?

Countywide, the annual median household income in 2009 was **\$52,671**. The tables below indicate the annual median price of full-time care for one child by age group and type of care. The median price indicates that half the providers in the area charge more and half charge less than the prices quoted here.

Centers	2009 Median Annual Cost for 1 Child	% of 2009 Med. Household Inc.
Infant	\$9,620	18%
Toddler	\$8,632	16%
Preschool	\$8,398	16%
School Age	\$4,940	9%
Family Child Care	2009 Median Annual Cost for 1 Child	% of 2009 Med. Household Inc.
Infant	NA	NA
Toddler	NA	NA
Preschool	NA	NA
School Age	NA	NA
Four-year Public University	2009 Annual Cost for 1 Student	% of 2009 Med. Household Inc.
Student at WSU	\$11,700	22%

Child care continues to represent a substantial expense for families. There are no family child care providers in San Juan County. The cost of full-time care for an infant in a center represents 18% of the county's 2009 median household income. Care for an infant and preschool child would represent 34% of the median income, which exceeds the annual cost of tuition for one student at a 4-year public university.

Families Using CCR&R Services

Who are the families that call the CCR&R Line?

Families in rural counties where there are few licensed child care options rarely request CCR&R assistance to find care. In rural counties like San Juan County, CCR&R staff focus on recruiting, training, and retaining providers to meet the needs of the community.

In 2009, **3** families called for child care referrals. Of these, one family was low-income, and one was headed by a single parent. No families requested non-standard hour care for their children.

What ages of children are referred?

Even though the largest population of children *eligible* for licensed care are school-age (5-12 years old), the only children *referred* are birth through three years old.
